

July 13, 2009 Meeting Notes

Meeting on July 13, 2009

Agenda

1. Attendance
2. Announce agenda
3. Approve [June 29, 2009 Meeting Notes](#). Ask for review and address any problems seen in the notes.
4. Update on Linux.
5. New features needing review.
6. Open Questions
7. Summary and closing

Notes

Attendance

- tclarke
- dadkins
- dsulgrov
- mconsidi
- raevans
- gmartin_cn

Summary

The Linux port is moving along and an automatic installer design is expected next week. kstreith is requesting evaluation of some feature designs which are available on <http://builds.ballforge.net> If you would like your blog aggregated on the Opticks site, talk to kstreith.

Decisions

Logs

2009-07-13T11:01:49 <tclarke> present
2009-07-13T11:01:52 <dadkins> here
2009-07-13T11:01:53 <dsulgrov> here
2009-07-13T11:01:57 <mconsidi> here
2009-07-13T11:02:00 <raevans> here
2009-07-13T11:02:02 <tclarke> 1. Attendance
2009-07-13T11:02:02 <tclarke> 2. Announce agenda
2009-07-13T11:02:02 <tclarke> 3. Approve [June 29, 2009 Meeting Notes](#). Ask for review and address any problems seen in the notes.
2009-07-13T11:02:02 <tclarke> 4. Update on Linux.
2009-07-13T11:02:02 <tclarke> 5. New features needing review.
2009-07-13T11:02:02 <tclarke> 6. Open Questions
2009-07-13T11:02:02 <tclarke> 7. Summary and closing
2009-07-13T11:02:06 <tclarke> previous meeting notes are here
<https://wiki.ballforge.net/confluence/display/opticksChat/June+29%2C+2009+Meeting+Notes>
2009-07-13T11:02:11 <tclarke> please review and make any corrections
2009-07-13T11:02:24 <tclarke> Kip and I have been working on getting the linux build up to snuff when we have spare time
2009-07-13T11:02:25 <gmartin_cn> here
2009-07-13T11:03:40 <tclarke> testbed so getting closer to functional
2009-07-13T11:03:47 <tclarke> I've been working on automatically building an installer
2009-07-13T11:03:57 <tclarke> I expect to have that done next weekend so we'll be able to post installs and sdks on hudson
2009-07-13T11:04:09 <tclarke> I'm also evaluating alternate dependency handling for multiple platforms
2009-07-13T11:04:17 <tclarke> I'm leaning towards opkg but I've got a little work to do in order to get it functional on windows
2009-07-13T11:04:29 <tclarke> it should lower download times for dependencies and give us some more flexibility in dependency handling
2009-07-13T11:04:33 <tclarke> that's about all for linux right now

2009-07-13T11:06:02 <**tclarke**> kstreith is not able to attend today so I'll just remind everyone he's got a few prototype installations on <http://builds.ballforge.net> with proposed designs for splitters and auto-scrolling

2009-07-13T11:06:10 <**tclarke**> on to open questions

2009-07-13T11:08:07 <**tclarke**> kstreith and I have been blogging more often, including kstreith's Opticks 101 series

2009-07-13T11:08:13 <**tclarke**> if anyone would like to start their own blog, let kstreith know and he'll aggregate on the wiki
